EDUCATION

Vellore Institute of Technology

B.Tech Computer Science and Engineering

- CGPA: 8.82

Expected Graduation: Apr. 2028

EXPERIENCE

PowerGrid

May 2026 – July 2026

Software Engineering Intern

- Developed backend applications using **ASP.NET Core**, **C#**, and **SQL** for enterprise software solutions.
- Built Machine Learning models for data analysis, prediction, and process optimization using **Python**.
- Worked with large scale **ERP/SAP datasets**, contributing to data integration and validation.

International Solar Alliance

May 2025 – Jul 2025

Data Management Intern

- Implemented data visualization techniques using Power BI, providing insightful dashboards and reports
- Added Jest for unit testing from scratch, **increasing code coverage from 0% to 100%**
- Collaborated with cross-functional teams via Slack and JIRA, **enhancing productivity by 25%**

RAD

Aug 2024 – Dec 2024

Data Engineering Intern

- Optimized data processing scripts with Numpy, Pandas, SQL **enhancing efficiency by 80%**
- Automated financial workflows resulting in a **50% reduction in manual processing time**
- Visualized dashboards using Python and Plotly for stakeholders to analyze data across 50+ datasets

PROJECTS

Interact – ETHGlobal Prague (Hackathon Winner)

- Developed a full stack dApp that lets users convert crypto into real world actions (food delivery, flights, shopping) using LLM based AI agents and virtual credit cards
- Deployed escrow smart contracts enabling trustless payments, dual attestation, and time based fallback mechanisms
- Enabled real time agent execution with **FastAPI**, **LangChain**, **WebSockets**
- Designed a dynamic Next.js + React frontend with wallet integration and real time logs

Mailed

- Built a Chrome extension for email tracking with real-time analytics and AI-based categorization
- Developed a responsive dashboard using **React**, **TypeScript**, and **Tailwind CSS**
- Integrated **Hugging Face API** and **Google OAuth** with a **Node.js** + **Supabase** backend

SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL, C, HTML/CSS

Libraries & Frameworks: React, Next.js, FastAPI, TensorFlow, Jest, Pandas, Numpy

Tools: Git, BigQuery, AWS, Jupyter, MongoDB, Node.js, Jira, PostgreSQL
